**Make a Sunburst Veneered Table Top**

veneer saw (Two Cherries® or equivalent)  
veneer tape (white-solid or perforated kraft)  
masking tape, ¾"W all-purpose (3M or equivalent)  
straight edge, 24"L or greater x 1½"T x 1½"W  
chisel, 1"W  
scratch stock  
mill file

If you are taking the Sunburst Veneered Table Top workshop, you will need to order your veneer and flatten it in advance. You may use any of the available solutions for treating veneers. Before ordering your veneer, you will need to determine the diameter of table you wish to make (42" max for our workshop) and the quantity and width of the sequentially-sliced sheets that will achieve the desired face. We will work with 6, 8, or 12-piece matches to make either a round or demi-lune top. Most veneer retailers can help you find the right size veneer for the job. It is usually a good idea to order one or two additional sheets.
